

# AUTO PREP

CLEANUP COMPARE CONVERT

Imagine having a CAD assistant open, clean and prepare all your AutoCAD background drawings by automatically performing the following tasks

- ✦ **Easily open Corrupt drawing files with, Unattached, Missing or Corrupt X-Refs.**  
*Repair, associate, or replace needed files, it can even automatically request missing files.*
- ✦ **Greatly reduce file size by removing redundant entities (Req Apps, Doubled Entities, Etc).**  
*This is accomplished automatically upon opening AutoPREP with preestablished settings.*
- ✦ **Easily remove Hatches, Blocks or even Nested Block elements, Globally without Exploding!**  
*Clear background drawings of all unnecessary entities to create design space in just minutes.*
- ✦ **Unique layer management tools to Combine, Simplify, Discern and Reduce Layers.**  
*Mark layers as protected so that nothing is changed by AutoPrep and so much more.*
- ✦ **Simplify complex text strings such as M-text into simple text.**  
*Resource intensive text can be globally converted to simple text of any size or font.*
- ✦ **Track all preparation input to be seamlessly replicated and applied to all revision drawings.**  
*Clean and prepare all subsequent revision drawings with literally, **“THE PUSH OF A BUTTON”!***
- ✦ **Automatically Compare and Define all modifications between drawings (Clouds or Color).**  
*Added or deleted entities, text, dimensions etc, are digitally detected and defined by placing “Revision Clouds” around them or Highlighting them with user defined colors.*
- ✦ **Batch File Processing of hundreds of drawings, UNATTENDED!**  
*Automatically perform these features on hundreds of drawings overnight and have them ready for review the next morning.*
- ✦ **Quickly separate files into Parent, X-ref, Missing and Standalone sub-component files.**  
*No need to open drawings to distinguish file type.*
- ✦ **Drawing Security to allow Architects and others to issue electronic files without worry.**  
*Original files can be viewed but not modified. Copies are automatically substituted for editing.*
- ✦ **Greatly increase production while relieving the stress of performing these tedious tasks.**  
*This is especially true for projects issuing continual revision drawings.*

**“Now, Imagine spending the majority of your time on meaningful design”**

**By The Way, You will be paying your new assistant less than minimum wage!**
